

THE PCF GROUP CREATES GIANT WATER DRAGONS FOR WATER PARKS IN CALIFORNIA, NEVADA AND NEW YORK

SAN DIEGO — May 13, 2004 — Pacific Coast Foam (PCF) has created a 10-foot-tall water spraying dragon for three water parks — Wet N' Wild in Las Vegas, Splish Splash in Riverhead, NY and Raging Waters in San Dimas, CA (see attached photo), according to Scott J. Buckley, vice president of marketing for The PCF Group, San Diego's largest supplier and installer of expanded polystyrene (EPS) foam architectural shapes and accents.

PCF's Art Department, headed by Colin Parmalee, designed, fabricated and finished the dragon, which is the centerpiece of the water parks' new Dragon's Den Ride. Renderings and a clay maquette of the dragon were provided in the design process. The fabrication started from foam using a combination of CNC machines and hand sculpting. Water lines were also installed for spraying water from the dragon's nostrils and tail. A polyurethane hard coat was then applied and the dragon was faux finished.

PCF and PCF/Install are located at 8585 Miramar Place, San Diego 92121. The telephone number is (858) 455-1274 or the company can be reached toll-free at 888-511-FOAM (3626).
